Billing Service Allows Personal Pricing Options
(BellSouth Interactive Media Services project will see marketing roll-out
in Chamblee, GA, in test of 12,000 homes)
Response TV, v 3, n 9, p 46
May 1995
WORD COUNT: 237

TEXT:
By Van Wallach

BellSouth has chosen CableData's Intelecable system to handle billing, subscriber and transaction management services for its interactive TV project set to begin technical testing this summer.

The BellSouth Interactive Media Services project will pass 12,000 homes in the Atlanta suburb of Chamblee, according to BellSouth Corp. spokesman Kevin Doyle. Customers will be paying for the services, which will include home shopping, video on demand, games and computer services. The marketing rollout will begin in early 1996, and the test will continue for a year.

Bob Crowley, senior vice president of U.S. Computer Services, Cables Data's parent company in Rancho Cordova, Calif., said, "We recognize that home shopping is one of the cornerstone applications." The Intelecable system will include a "rater discounter" feature that will let TV marketers quickly determine individualized prices for TV shoppers.

Crowley said, "Once you've selected a sweater on, say, the Macy's channel, then based upon your personal identification number, a realtime rate will come on the screen based on your buying behavior." The price might vary depending on such factors as whether a shopper has a Macy's credit card and volume of past purchases. Based on these factors, the shopper would see a personalized discounted price as well as the item's retail price.

"It really is a prerequisite to true interactive video shopping," said Crowley.

The BellSouth project marks the first time Intelecable has been used in the United States, following initial use in the United Kingdom.

One Time Only Incentives and Inventory Policies

Goyal, S. K.; Srinivasan, G.; Arcelus, F. J.
European Journal of Operational Research v54n1 PP: 1-6 Sep 5, 1991
ISSN: 0377-2217 JRNL CODE: EJO

ABSTRACT: The literature available on inventory policies under incentives on a one time only basis is reviewed. It is a common industrial practice to offer special incentives to motivate the buyer to order in larger than regular order quantities. Such special deals are available for a limited time only. The literature on inventory policies under conditions of incentives is classified by the nature of incentives, such as price discount and credit period. A situation of announced price increase that is very similar to price discount is reviewed. The policy implications of various scenarios are highlighted, and areas of future research...

... will delay purchase and either deplete inventory or forego current consumption if they feel the price will be lower in the future.

A utility-maximizing consumer recognizes that the "true" value of a good depends on what it will cost in a subsequent time period and on the cost of delaying the purchase . Neither past prices nor expectations of current prices plays a role in this intertemporal utility function. They...

... professions as law, accounting and public relations. I reviewed one of them --Rags to Riches Time Billing--in PRJ in 1988 (February, page 10). Recently, I took another look at that program, and two new contenders in the time -billing arena: North Edge Software's Timeslips [R] III for Macintosh, and Layered's Insight! Expert Time Billing. This month, I'll report on the least expensive of the three programs: Timeslips III (\$299.95 list price , heavily discounted by mail order); the other two will be reviewed in future issues.

Timeslips III is a stand-alone accounts receivable...

OIL PRICES FALL BELOW \$30 A BARREL
TIMES UNION (AL) - SATURDAY November 17, 1990
By: Matthew L. Wald New York Times
Edition: One Star Section: Main Page: A1
Word Count: 698

... Friday, crude for December delivery fell \$1.34 a barrel, to \$29.78. The last time the spot contract closed below \$30 was on Oct. 23.

Market experts said the \$30 level was an important barrier. Some in the market had left standing orders to buy at that price , which made it a level of strong support.

After Iraq invaded Kuwait on Aug. 2...

For example, a customer purchasing a...cash registers, are used in a wide variety of businesses for performing such processes as calculating the total price of a purchase (goods or services) and calculating the amount of change due to a...
.POS terminal determines an upsell in dependence on a purchase of the customer, and also determines an "upsell price " (the amount of change due) based on the purchase. For example, a customer purchasing a...
.cash registers, are used in a wide variety of businesses for performing such processes as calculating the total price of a purchase (goods or services) and calculating the amount of change due to a...POS terminal determines an upsell in dependence on a purchase of the customer, and also determines an upsell price (the amount of change due) based on the purchase. For example, a customer purchasing a...represents information relating to transactions.

FIG. 64 is a flow chart describing a method for determining a rounded price for a purchase that includes an upsell and one or more items.

FIG. 65 is a flow chart describing a method for determining a rounded price for a purchase that includes a plurality of upsells and one or more items.

FIG...1050) equal to the difference between the purchase price and the rounded price. The rounded price may be calculated as, for example, the smallest whole number dollar amount that is greater than the purchase ...

...consists solely of coins the customer desires, such as quarters. Many other forms of rounded prices may be calculated in accordance with 1 5 the present invention.

The POS terminal then determines at least...A cashier records the purchase at a POS terminal, and the POS terminal in turn determines the product prices of each of the hamburger and the small soda from entries 1070 and 1072 in...

...in this example, "2" as the smallest whole number which is greater than the purchase price), and

45

calculates a round-up amount 1074 of \$2.00 - \$1.62 = 380. Since the rounded price...the purchase is processed at the POS terminal. Some types of purchase conditions are the purchase price , time of day, day of the week, season, the identity of a product included in the purchase, the cost of a product included in the purchase , and/or past purchases made by the customer. Other types of purchase conditions may be employed without departing from the spirit and scope of the present invention...which the purchase price is rounded if the customer accepts the offer. Thus, the purchase price would be determined , and then rounded in accordance with the corresponding rounding multiple to yield a rounded 80...

...to the items, and thereby determine the corresponding upsells of those records.

The POS terminal determines a rounded price that the customer may pay for both the items and the upsell(s) (step 3286). As described above, the rounded price may be determined by rounding up the purchase price to a predetermined multiple, such as to the 1 5 next higher dollar amount. In other embodiments, the rounded price is determined from the upsell offer database. In one embodiment, the rounded price may be determined based on a record of the upsell offer database. For example, as described above with...is subject to sales tax (or other tax). The inventory database 5024 is accessed to determine a purchase price in a manner known in the art. For example, each item of a purchase may... FIG. 64 illustrates a method 5150 in which the above-mentioned databases are used in determining a rounded price for a purchase that includes an upsell and one or more items.

A POS terminal...

...after the receiving of the item codes. After all codes are received, the POS terminal determines a purchase price from the item codes (step 5156). As described above with reference to FIG. 62, the purchase price is determined by summing the price with tax of each item. The POS terminal determines a rounding...

...rounding code has both 5 a fixed price and a rounding multiple. Thus, a fixed price may be determined for each upsell.

FIG. 65 illustrates a method 5180 for determining a rounded price for a purchase that includes a plurality of upsells with rounding codes. The POS terminal...

...each of a plurality I 0 of upsells (step 5184). As described above, a purchase price is determined from the item codes (step 5186).

One of the rounding ...of each remaining (unselected) rounding code is determined (step 5192). As described above, the fixed prices are determinable from the rounding code database 5026 (FIG. 57 and FIG. 61). These fixed

97

prices are added to the purchase price determined at step 5186, thereby generating an augmented price (step 5194). This augmented price is rounding...

... with activation of buy/sell indicator to buy/sell stocks, to server, and displays received purchase /selling price of stock and changing value of stock with time

Abstract (Basic):

... indicator, to buy or sell specified amount of stock to a server and displays received purchase or selling price of the stock. The terminal periodically updates the changing value of the stock with time and indicates the money available for the purchase. The server processes the received buy and sell orders on behalf of terminal user.

ABSTRACT

...price information providing system and method for solving the problem of a large amount of time being needed, in purchasing a product over the Internet.

SOLUTION: A product purchase wisher uses...

... own user terminal 10 for transmitting product information of a product the wisher wants to buy , desired purchase price information and the person in question information to an information providing center terminal 20 via the Internet 100. When an information providing center terminal receives the product information, the desired purchase price information and the person information, the information-providing center terminal records the product information, the desired purchase price information and the person in question information in a database 21. The information- providing center...

... matches the product information registered in the database and is less expensive than the desired purchase price information and transits to the user terminal information needed to purchase the product.

Title: Is price -quantity discount dead in a just-in- time environment?
Abstract: The JIT purchasing environment and relevant literature are reviewed. The price quantity discount (PQD) in purchasing and its advantages to suppliers and buyers is reviewed. We develop an integrated JIT-PQD model. The proposed model allows the buyer to place orders in large quantities (and thereby take advantage of PQD) and receive deliveries in small lots...

Title: One time only incentives and inventory policies

Abstract: Presents a review of the literature available on inventory policies under incentives on a one time only basis. It is quite a common industrial practice to offer special incentives to motivate the buyer to order in larger than regular order quantities. Such special deals are available for a limited time only. The literature on inventory policies under conditions of incentives has been classified by the nature of incentives such as price discount and credit period. A situation of announced price increase which is very similar to price discount is also reviewed. The policy implications of various scenarios are highlighted and areas of future...
